

Company	Water Cop	Floglogic	Avante Security 724 S-WIP
Water control product	Water Leak Sensors	Water flow sensors	Water flow sensors
Website	http://www.watercop.com	http://www.floglogic.com	http://www.avantesecurity.com
Function/Description	Sensors installed on wall or floor below water-bearing appliances or fixtures. Sensors may be hard wired or wireless, which uses battery operated sensors that send radio signal to control valve if leak is detected. Batteries in wireless systems must be regularly maintained and replaced.	Flow sensor is installed on the home's main water line. Sensor is programmed to allow continuous water flow based on specific water needs during a given time. If water exceeds programmed amount of time, valve will close to stop flow of water. Sensors programmed for varying times, depending on whether home is occupied or away from home for period of time.	724 S-WIP is installed on the home's main water line. The sensor is programmed to allow continuous water flow based on specific guidelines the client requires with regards to usage and alerts for thresholds. If water exceeds programmed amount, the valve will close to stop the flow of water. The sensors can be programmed for varying times depending on the month, whether the home is occupied or vacant.
Canadian Support	Yes (toll free sales & technical support in Montreal for all Provinces)	Yes (Distribution from USA for all Provinces)	Yes (Ontario)
Actively Shuts-off the water main	Yes	Yes	Yes
Wireless Sensors located in the home	Yes	No (Single installation point)	Yes
Installation	Wireless and no programming	Wired control panel with programming	Wireless with programming
Applied to existing alarm system	Yes	Yes	Yes
Presence of a control panel	Yes	Yes	Yes
Available for all pipe sizes	Yes	Yes	Yes
Battery back up	Yes	Yes	Yes
Low temperature sensors	Yes	No	Available
Plumber installation	Yes (1 hr)	Yes (1 hr)	Yes (1hr)
Product Cost	\$450 and up (starting package with two sensors, \$50 for each additional sensor needed - price range varies and can be above \$1000, plus installation fees).	\$1000 (plus shipping and installation fees).	\$225 (plus additional fees which may include additional components)
Chubb water leak detection credit (U.L.C. Master Label. System must monitor all areas containing plumbing devices and outlets. In the event of a leak, system must close the master plumbing valve and activate a central station or direct alarm)	5% (Requires adequate number of sensors based on number of water bearing appliances and fixtures in the home)	5%	5%
Request for credit worksheet	Yes (Watercop sends completed worksheet to the broker on behalf of client)	No (Customer must forward plumber invoice - alarm certificate to the broker)	No (Customer must forward plumber invoice - alarm certificate to the broker)

Chubb refers to members insurers of the Chubb Group of Insurance Companies.
